

SYSTEM MANAGER

Flexibility, customization, and a full complement of tools

TRAVERSE gives you the tools you're already familiar with and provides a seamless interface to Microsoft products such as Word, Excel, and Mail as well as HTML language for the Internet. It was developed with Visual Basic™, SQL Server, and Microsoft Access—the most powerful databases available. Access has a simple design philosophy, so it is easy to use for everyone—regardless of the level of expertise. SQL Server integrates with the BackOffice family of products, including Exchange and Internet Information Server.

TRAVERSE runs on Windows 98, Windows 2000, Windows XP and Windows NT®. Source code is available so that you can customize the software to meet your unique needs. System Manager provides features such as multilingual and multicurrency capabilities, and users can choose keyboard navigation, point-and-click navigation, or both. And, it's easy to move and merge information.

TRAVERSE manages your financial information quickly, easily, and effectively. You can do quick sorts on any field in ascending or descending order with just one mouse click. In addition, TRAVERSE provides password protection by application, menu, function, and database objects. You'll also find table-driven international and industry specific language sets and such individual workstation options as keyboard controls, toolbars, and language sets.
